# SCALE FOR PROJECT LIBFT (HTTPS://PROJECTS.INTRA.42.FR/PROJECTS/42CURSUS-LIBFT)

You should evaluate 1 student in this team

Git repository

git@vogsphere.42roma.it:vogsphere/intra-uuid-8dca8c0f-db1c-49ec-96fc-

### Introduction

Please comply with the following rules:

- Remain polite, courteous, respectful and constructive throughout the evaluation process. The well-being of the community depends on it.
- Identify with the student or group whose work is evaluated the possible dysfunctions in their project. Take the time to discuss and debate the problems that may have been identified.
- You must consider that there might be some differences in how your peers might have understood the project's instructions and the scope of its functionalities. Always keep an open mind and grade them as honestly as possible. The pedagogy is useful only and only if the peer-evaluation is done seriously.

# **Guidelines**

- Only grade the work that was turned in the Git repository of the evaluated student or group.
- Double-check that the Git repository belongs to the student(s). Ensure that the project is the one expected. Also, check that 'git clone' is used in an empty folder.
- Check carefully that no malicious aliases was used to fool you and make you evaluate something that is not the content of the official repository.
- To avoid any surprises and if applicable, review together any scripts used to facilitate the grading (scripts for testing or automation).
- Do not blindly trust any scripts. The tester could be wrong!
- Check the makefile: no wildcard, no relink, or the final grade is 0.
- Use make, then make --debug to be sure.
- If you have not completed the assignment you are going to evaluate, you have to read the entire subject prior to starting the evaluation process.
- Use the available flags to report an empty repository, a non-functioning program, a Norm error, cheating, and so forth.

  In these cases, the evaluation process ends and the final grade is 0, or -42 in case of cheating. However, except for cheating, student are strongly encouraged to review together the work that was turned in, in order

to identify any mistakes that shouldn't be repeated in the future.

- You should never have to edit any file except the configuration file if it exists. If you want to edit a file, take the time to explicit the reasons with the evaluated student and make sure both of you are okay with this.
- You must also verify the absence of memory leaks. Any memory allocated on the heap must be properly freed before the end of execution. You are allowed to use any of the different tools available on the computer, such as leaks, valgrind, or e\_fence. In case of memory leaks, tick the appropriate flag.

□ subject.pdf (https://cdn.intra.42.fr/pdf/pdf/102878/en.subject.pdf)

# **Mandatory part**

You must test each of the functions of the libft with your own tests.

#### **Libc Functions #1**

Test every function and make sure they work properly:

- ft strlen
- · ft memcpy
- ft\_memset
- ft\_bzero
- ft\_memmove
- ft memcmp
- ft\_memchr Is everything working?

□ Yes	□ No

### Libc Functions #2

Test every function and make sure they work properly:

- ft isalpha
- ft\_isdigit
- ft isalnum
- ft\_isascii
- ft\_isprint Is everything working?

□ Yes □ No	
------------	--

### LibC functions #3

Test every function and make sure they work properly:

- ft\_toupper
- ft\_tolower
- ft\_strchr
- ft\_strrchr Is everything working?

□ Yes	□ No

### LibC functions #4

Test every function and make sure they work properly:

- ft\_strlcat
- ft\_strlcpy
- ft atoi
- ft\_strnstr

	□ Yes	□ No
dditional functions #1		
est every function and m	ake sure they work properly:	
<ul> <li>ft_substr</li> </ul>		
<ul><li>ft_strjoin</li></ul>		
<ul><li>ft_putchar_fd</li></ul>		
ft_putstr_fd     ft_putsndl_fd		
<ul><li>ft_putendl_fd</li><li>ft_putnbr_fd Is ever</li></ul>	rything working?	
n_pathbi_la le evel	yamig wenang.	
	□ Yes	□ №
Additional functions #2		
est every function and m	ake sure they work properly:	
<ul> <li>ft_strmapi</li> </ul>		
ft_striteri		
<ul><li>ft_strtrim</li><li>ft_split</li></ul>		
<ul><li>it_spiit</li><li>ft_itoa Is everything</li></ul>	working?	
	, ······ <del>··</del>	
	□ Yes	□ No
